TASMANIAN ACCOMMODATION REPORT

JUNE 2026

Tourism Tasmania's **Monthly Accommodation Report** contains a summary of commercial and short-stay accommodation results for the state and regions, drawing on data from STR Global and AirDNA. These reports complement Tourism Tasmania's regular quarterly reporting on the visitor economy including the **Tasmanian Tourism Snapshot** and updates to the interactive **TVS Analyser** dashboard.

STATE SUMMARY

Statewide room-nights booked were up on last year for the month and year ending June 2026, while stable for the quarter.

- In line with state-level seasonal trends, commercial occupancy in June remained stable on May.
- June 2026 saw a record number of nights booked in short-stay accommodation for any previous June reaching 64.5k, up 2% on 2025.
- Occupancy in the commercial sector was up in the month of June, while stable for the quarter (-0.7%pts) and year ending June (+0.8%pts) across all regions compared to 2025, with the state level sitting at 65.9% in the month of June 2026, up 2.7% pts on last year.

REGIONAL INSIGHTS

SOUTHERN

- The south saw an overall lift in room nights booked across commercial and short-stay accommodation for the month, quarter and year ending June 2026, compared to last year. Short-stay booked nights set a record for the month of June, while commercial occupancy reached its second-highest level in the last 7 years.

NORTHERN

- Total room nights booked were down on last year for the month, quarter, and year ending June 2026, compared to last year. Commercial accommodation occupancy remained at an elevated level on par with last year. Short-stay booked nights decreased 1.6% on 2025, although only a slight decrease this was enough to bring the total booked nights down for the month of June.

EAST COAST

- The east coast was up for the month and year ending June 2026, while down for the quarter. Monthly commercial occupancy was up slightly on June 2025 (+0.5% pts) now at its fourth-highest level in the past 7 years. Demand for nights in short stay set a record for a June by a fine margin in 2026, up 1.7% on 2025.

NORTH WEST

- Overall room nights booked across the north west were up for the month, quarter and year ending June 2026. Short stay nights in June were down 2.2% on the same period in 2025, currently at the second-highest level ever. Commercial accommodation occupancy was up 7.5% points on 2025 and at its highest level in the last 4 years.

WEST COAST

- The region experienced a soft June relative to the same month in 2025 with booked nights down on last year for the month, quarter and year ending June 2026. Short stay booked nights were down 18.7% in June, although still at their third-highest level. No data is available for this region for commercial occupancy rates.

DATA SOURCES

COMMERCIAL ACCOMMODATION

Compiled by global research company STR drawing on data provided by operators across multiple accommodation types including hotels, motels, lodges and holiday parks, and primarily properties with more than 10 rooms. Regional data is only provided for a region when the mix of providers is representative across operator size, rating, brand affiliation and rates. The West Coast does not have sufficient operator participation for occupancy reporting.

SHORT-STAY ACCOMMODATION

Compiled by AirDNA from Airbnb and VRBO platforms covering holiday homes, shacks, pods and self-contained apartments, as well as some traditional bed and breakfasts. Tourism Tasmania reporting includes only 'entire places', where a guest has access to their own kitchen, bathroom and bedrooms. Demand (booked nights) is the preferred indicator for the short-stay sector, as it removes any fluctuations from properties going on and off availability, such as properties only listed over peak periods.

NOTES ON INTERPRETING THE DATA

Both are effectively samples of the sectors, with neither reaching 100% coverage of all accommodation options, such as paid sites for camping or caravans, and does not include nights spent in other options (e.g. staying with family or at a friend's shack). There can be duplication of listings across commercial and short-stay datasets. While the datasets provide an indication of demand for the main accommodation options, this is only one aspect of visitation to a region. Tourism Tasmania regularly publishes a range of visitor data at www.TourismTasmania.com.au/research/visitors

HELP US IMPROVE THE COMMERCIAL DATA

Commercial accommodation operators can help improve this dataset by contributing to the STR program.

STR provides accommodation operators an opt-in system to add their data to an anonymous aggregate report, drawing on a broad capture of platforms and booking systems, across a wide range of accommodation types.

Please contact Jacqueline (jchoo@str.com) to contribute anonymously to industry insights and monitoring, and access your own bespoke report.

KEY TERMS

- **Listing nights booked** is the number of nights a listing was booked in a period. A 'listing' for this reporting is a single bookable option, regardless if that is a two-bedroom hotel room or four bedroom short-stay property.
- **Occupancy rate** is the room nights booked divided by room nights available, expressed as a percentage.
- **Percentage point change** refers to the absolute difference between two percentages, whereas percent change is the percentage difference from another value.
- Percent and percentage point changes in this report are calculated on the unrounded figures with more decimal places shown where figures are close and benefit from further differentiation.
